

AMPA

Full Stack D2D Rep Recruiting & Management Platform A Proposal for Hawx Pest Control

Prepared by Eric Canche · Dauntless LLC · May 2026 · Confidential

The Problem Hawx Has Right Now

Every summer, Hawx invests heavily in recruiting door-to-door sales reps. But three things quietly kill ROI every season:

- Bad leads getting through. Unqualified reps make it to training, waste manager time, and quit week two.
- Slow onboarding kills momentum. New reps figure out the platform, pitch, and process on their own. The longer to first sale, the higher the dropout rate.
- Managers have no visibility. No single place to see which reps are active, stuck, or ghosting — until it's too late.

The result: High churn, high recruiting costs, undertrained reps in the field, and managers chasing people instead of leading them.

What AMPA Is Building

AMPA is a full-stack recruiting and rep management system designed specifically for the D2D industry. It handles everything from the moment a rep sees an ad to the moment they're producing in the field — and everything in between. This is not a generic CRM. This is built ground-up for how D2D sales teams actually operate.

The Full System — Point A to Point Z

Point A — Recruiting Funnel

A high-converting landing page targeted at 18-22 year olds looking for high-income D2D opportunities.

- Attracts candidates via Meta/Instagram ads
- Short application form — state, vertical, experience, travel availability
- Explicit SMS consent capture — fully TCPA and A2P 10DLC compliant
- Immediately triggers the AI screener the moment someone submits

Why it matters for Hawx: Only serious, pre-qualified candidates ever reach your managers.

Point B — Sarah (AI Voice Screener)

An AI phone recruiter that calls every applicant within 15 seconds of form submission — 24/7, no manager required.

- Discloses she's an AI, asks permission to continue
- Hard-screens for 4 disqualifiers: commission-only, long hours, travel, no employer insurance

- Runs structured interview: why sales, goals, 1-10 interest score, start date
- Qualified leads get a mystery close that builds curiosity for the M2 conversation
- Full transcript, outcome, structured data, and recording logged automatically

Tech: Vapi.ai + ElevenLabs Flash v2.5 + Deepgram Nova-3 + GPT-4o-mini. Sub-2 second response latency.

Why it matters for Hawx: Managers only spend time on pre-screened, motivated leads. Sarah runs while they sleep.

Point C — 10-Touch SMS Drip Sequence

Automated 10-message SMS sequence running for every lead — answered or not — over 60 days.

Touch	Timing	Theme
1	Immediate	Opener — still interested?
2	+2 hours	"Tell me more" hook
3	+24 hours	No experience needed
4	+3 days	Social proof (\$9,400 first month)
5	+5 days	3-question checklist + booking link
6–10	+8 to +60 days	Objection handling, urgency, re-engagement

Why it matters for Hawx: No lead goes cold automatically. The system works the pipeline 24/7 with zero manager involvement.

Point D — William (AI Onboarding Bot)

An AI onboarding assistant that lives inside the AMPA Network platform and walks every new rep through onboarding step by step — from day one to first Blitz.

- Rookie Flow: Payroll setup !' team group chat !' training modules in order !' pitch memorization !' manager pass-off !' first Blitz
- Veteran Flow: Leadership course (hire, fire, interview, recruit) !' management integration !' more Blitzes
- 48-hour inactivity trigger — if a rep stalls, William follows up once. Smart, not spammy.

Why it matters for Hawx: A rep who gets their first sale within 30 days is dramatically more likely to finish the season. William's entire job is to compress that timeline.

Point E — Rep Management Command Center

A standalone platform synced from AMPA Network giving every manager a real-time view of their entire downline.

- Every signed rep auto-populates into the dashboard
- Ø=ßâ Green = fully onboarded, active, producing
- Ø=ßá Yellow = onboarding in progress, steps incomplete
- Ø=Ý4 Red = ghost mode — no engagement in X days
- Built-in SMS and calling — reach any rep directly from the dashboard
- Phase 2: Live revenue integration — Hawx sales data next to every rep's profile

Why it matters for Hawx: Right now managers find out a rep quit when they stop showing up. This platform shows the warning signs weeks earlier.

Point F — Commission Dashboard

Live earnings tracker showing every rep exactly where they stand — built on Hawx's actual pay scales.

- Real-time commission calculation at every account milestone
- Rookie and veteran pay scale tiers built in (26% up to 75% Golden Door)
- Reps always see exactly how many accounts to the next tier

Why it matters for Hawx: When reps can see their exact number in real time, they knock harder.

How It All Connects

```
Meta Ad !' Landing Page (ampa-recruiting.vercel.app)
!" Form Submit + SMS Consent
Sarah AI calls in 15 seconds
%%% NOT QUALIFIED !' 60-day SMS re-engagement drip
%%% QUALIFIED !' Post-call SMS + Calendly booking link
!" M2 Interview with Manager
Rep Signs on AMPA Network
!" William walks them through full onboarding
Command Center tracks progress in real time
!" First Blitz !' First Sale within 30 days
Live revenue tracked on Commission Dashboard
!"
Rep retained !' Returns next season Ø=Ý
```

What This Means for Hawx

Metric	Before AMPA	With AMPA
Time to screen a lead	Hours (manual)	15 seconds (AI)
Manager time per bad lead	20–45 minutes	0 minutes
Rookie dropout before first sale	~50% industry avg	Target: significantly lower
Visibility into rep progress	None until they quit	Real-time, color-coded
Onboarding consistency	Manager-dependent	Standardized + automated
Cost per qualified placed rep	High	Dramatically lower at scale

The Opportunity for Hawx

Option 1 — Pilot Partnership

Run AMPA's recruiting funnel for one region this summer. Measure qualified leads, onboarding completion rates, and first-month retention against your current baseline. Zero risk — if the numbers don't move, you walk away with data.

Option 2 — Platform Licensing

Once the full stack is proven, AMPA becomes a white-label platform Hawx deploys internally across all teams and markets. Every manager gets their own Command Center. Every rep gets William. Every lead gets Sarah. The system gets smarter with volume.

Current Build Status

Component	Status
Recruiting landing page	' Live
Sarah — AI voice screener	' Live
10-touch SMS sequence	' Built
Supabase database + call logging	' Live
A2P 10DLC compliance (Twilio)	#ó Carrier approval in progress
Sarah retry queue (no-answer callbacks)	' Live
Commission dashboard	' Live
William — onboarding bot	Ø=Ý(In development
Rep Management Command Center	Ø=Ý(Scoped, starting development
Live revenue integration (Hawx API)	Ø=ÜË Phase 2 — requires Hawx data access

About Eric Canche / Dauntless LLC

Eric Canche is an active D2D sales operator with firsthand experience recruiting, managing, and retaining reps in the pest control space. Dauntless LLC is the operating entity behind AMPA Recruiting — built not by a tech company trying to understand D2D, but by someone who has lived it.
